Talking about Vaccination...

vais
vaccination answers informed sources

QUESTIONS TO ASK YOUR DOCTOR...

1. How do you keep up-to-date on the vaccination issue?
   Could you provide me with the latest information you have on vaccination success and effectiveness to take home and read?
   .....
2. What are ALL the reactions to the vaccines on the recommended schedule?
   Could you provide me a copy of the product insert to read at home?
   .....
3. Why is the same dose of vaccines given to a two month old baby as is given to a 5 year old?
   .....
4. I hear about the need to achieve herd immunity? How is it that in the U.S.A. which has a 98% vaccination rate, they still have major outbreaks of these diseases, and mostly in the vaccinated children?
   .....
5. I know that most diseases were already 90% gone before any vaccination was introduced. How can vaccines be applauded for decreases in diseases, especially when there were no vaccines for some diseases which have also disappeared?
   .....
6. Government literature states that if an unvaccinated child gets a disease, they are more likely to develop a more severe case than a vaccinated child. Can you provide me scientific data to support this claim?
   .....
7. If a vaccine does harm my child, where will you report the reaction?
   Will my family be financially compensated or supported for vaccine damage?
   .....
